

Caregivers of Individuals with Burn Injury

Needed

for a Research Study

MSKTC is conducting interviews with caregivers of individuals with burn injury. Answers from the interviews will be used for research purposes to better understand (a) the health information needs of caregivers of individuals with burn injury and (b) their participation in research studies.

To be eligible to participate, caregivers must meet the following criteria:

- Must be 18 years of age or older
- Must be a caregiver (non-paid) to a family member or close friend
- Must have provided care (previously or currently) for burn injury for a minimum of 1 year
- Must have access to and the ability to communicate over a phone
- Must speak English

Interviews will last approximately 60 minutes. Participants will receive \$75 for their time.

Contact: If you're interested in participating, please contact Dr. Ali Weinstein:

703-993-9632 or aweinst2@gmu.edu.

The study is funded by the National Institute on Disability, Independent Living, and Rehabilitation Research (NIDILRR) and is carried out by the Model Systems Knowledge Translation Center at the American Institutes for Research, in collaboration with George Mason University.
