The Model Systems Knowledge Translation Center (MSKTC) is a national center that works with Model System researchers to translate health information into easy-to-understand language and formats for people living with spinal cord injury, traumatic brain injury, and burn injury and those who support them. The MSKTC is funded by the National Institute on Disability, Independent Living, and Rehabilitation Research (NIDILRR) and is operated by the American Institutes for Research (AIR) under grant number 90DPKT0009.
